

SOLAR-POWERED LIGHT FOR YOUR PLAYGROUND

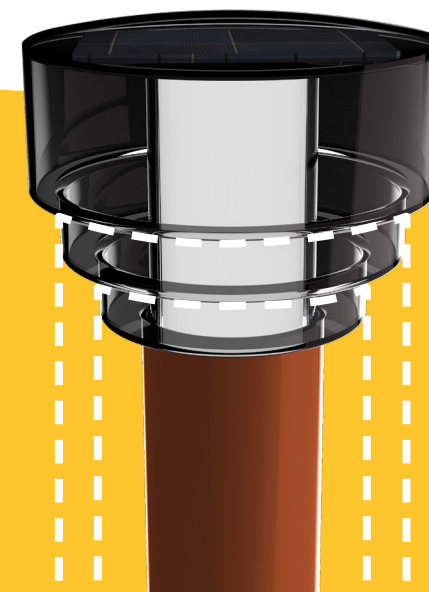

Inspire greater safety in your community with PlaySoleil™, an inexpensive and efficient solar lighting method that increases playground security after hours. Its downward light deters vandalism, destructive behavior, and inappropriate nighttime use of your playground, while minimizing light pollution (only 8-15 lumens).

Innovative solar panels charge PlaySoleil's lithium-ion batteries during the day. PlaySoleil then activates at sunset to produce white light for 6+ hours. No digging or electrical wiring required. Choose PlaySoleil, and let the sun be your partner in powering play.

PlaySoleil can be easily installed on new or existing play structures because there is no need to pre-drill light posts. It uses a self-tapping screw for quick, seamless installation, and its stair-step design enables PlaySoleil to fit 3.5", 4" or 5" (8.89cm, 10.16cm, 12.7cm) diameter posts.

Recommended Placement: 84" above the tallest standing surface.
Patented: US11221116, CA3136514, other patents pending

1000 Buffalo Road, Lewisburg, PA 17837-9795 USA
