# Get More from Your Playground & More for Your Money

## Why shade?

Playgrounds are a big investment—and like any other investment, you want to feel confident that you're getting the most value and the best quality for your dollar. Play Shade offers that added assurance—protecting your playground equipment and amenities while improving the guest experience.

The right fabric structure can block up to 96% of harmful UV rays, and can make your playground up to 20°F (-7°C) cooler year-round, allowing for longer play. Shade can also make your playground more inclusive—some children and adults have sun allergies, and others are more susceptible to sun poisoning and overheating due to certain medications. These medications are commonly used by children who have epilepsy, cerebral palsy, and autism. Children with these conditions might be unable to go to a playground unless there's adequate shade.
